Members of the review panel,

I understand that there is a great deal of pressure, on certain WCB people, to minimize claims costs. Amidst 30% overstaffing, promotions may depend on how well this is accomplished. However, personal honesty should not be sacrificed in the process. The lives of many claimants, and their families, have been destroyed, within the present system. In addition to dr's reports, which I feel clearly represent " false statements ", I was subjected to 2 years of harrasment, intimidation, and outright terrorism, by WCB's investigation unit, working together with the City of Winnipeg, police dept. they had no grounds, whatsoever, to initiate this, and, probably, most of the other 500 cases that they investigate every year. Additionally, 2 suicides [XXX employees], in the past couple years, many acquaintances of the deceased individuals feel, are directly attributable to the present way, in which, business is carried out, by the WCB.

Thank you for trying to make a difference,

Jim Overly
